

Excerpts from emails sent to James in reference to tonight's (Oct 9th 2016) Show

"I met Korton through Bob Short and then had a stunning event on the trip back home that left no doubt about his reality. That was circa 1981-82. I had no interest in hooking up with any ET at the time and nothing came of it immediately. Then I had huge sighting in 1985 and then again in 1992. It's a long, long story. Then 25 years later I've ended up predicting and tracking what Korton talked about on "To Men of Earth," which Daniel Fry used as the title for his book, originally named "The White Sands Incident."

In my {Web of LiFe} pdf , I cite George Hunt Williamson in Chapter One and evidence for Maldek and Tiamat. That would be a good topic to discuss because both Miller and Williamson talk about Maldek. When my contacts asked me to go public in 1988, I soon realized that people had very little data to evaluate what "is and "is not" in human terms and decided to gather evidence for things they talk about. I rarely talk to people about details of my contacts until they have some data to evaluate what it means. I started a log of key psi-telepathy in 2011 for reasons that are clear in the log.

Comparing Mon-ka's message about Maldek with what I found, the current situation on this planet, and what George Hunt Williamson wrote about it is a good subject for an interview. This is the 60th anniversary of Richard Miller's radio series (1956-2016). What a difference 60 years make in human culture! My findings are in Chapter One of my book and George Hunt Williamson's deductions are in "Other Tongues Other Flesh." My latest post on geophysical conditions of this planet are on my Facebook Timeline. <https://www.facebook.com/krsanna>

CONNECTS MILLER'S MALDEK WITH CHEM TRAILS & HISTORY.

In a twisted tangle of fate, Hillary's vengeance (*i.e. Drones at Assange*) echoes the legacy of chem trails and self-destruction of the planet Maldek in the orbit now occupied by the asteroid belt. Substances containing cadmium, aluminum and lithium that "seared" the minds of the people of Maldek, according to a UFO shortwave radio transmission to contactee Richard Miller in 1956, are identical to elements in chem trails used on Planet Earth in the 1990s, or 40 years after the transmission. This cocktail of elements had not been mentioned anywhere else in 1956 before it was used in chem trails decades later, and this single factor gives the Galactic Confederation's data transmission credibility. The Confederation related that a more advanced civilization had grown on Maldek with two main cities, Karnal and Medur. They had gone through evolutionary cycles of war and strife and finally reached a spiritual awareness. Medur was a "hanging jewel" of human achievement and many Confederation people visited it. After many hundreds of years the people of Maldek were exposed to a fissionable material their government was exploring, when a missile containing cadmium, aluminum and lithium that had been tampered with exploded over Karnal. People of Karnal accused Medur of intentionally causing the accident and, inflamed as they were with exposure to radiation and chemicals, demanded retribution. A nuclear war of gigantic proportions ensued, and, bound by their laws, the Confederation could not intervene. After many delegations pleaded with the people of Maldek to stand down to no avail, the Confederation withdrew. In the war of vengeance between the two main cities, instigated by the failed experiment by their

government, Maldek destroyed itself in nuclear war. Rubble from the planet resides in the asteroid belt today.

Maldek, the Lost Planet: <http://innersites.com/issa/miller/space/MSTS-4.rm>

On Earth with its chem trails and nuclear radiation, Hillary Clinton has waged vengeance attacks against adversaries throughout her adult life and wants to drone strike Julian Assange, already confined in the Ecuadorian embassy for five years.

This madness must stop.

Best regards, Krsanna
